

## PRICE LIST FOR INK CARTRIDGES-

FEBRUARY/MARCH 2021

Did you know that it takes up to 1000 years for an ink cartridge to decompose in landfill? Sadly, 80% of these are still thrown away every year!

The Ink Bin was created with the wish to recycle as much of this waste stream as possible. Unlike many companies, we accept and recycle every last ink cartridge sent to us. Wherever possible, they are refilled and sent back into the circular economy to reduce their carbon footprint.

We are able to give funds back to schools and charities for certain cartridges- these are the inkjets and our current prices are listed below. We have included most of the models but please do reach out if you cannot see your cartridges listed. We constantly review these prices in order to ensure we are giving you the best values possible and work hard to support your collecting.
